

Bunubu and the River That Needed Wi-Fi

— A grumpy little forest river stops flowing until it can catch a better signal. —

The Still Stream

Bunubu packed his knapsack and put on his rain hat.

He marched down to the forest stream to watch the water race.

But the river was not racing. It was sitting completely still, like a long blue rug.

No Bars in the Forest

“Why aren't you flowing?” Bunubu asked.
The river didn't splash. It just held up a small sign
made of reeds.
It showed zero bars of Wi-Fi signal. The river was
waiting to connect.

Enter Glitchub

With a *beep-boop!*, a strange new friend
waddled out from the hollow tree.
It was Glitchub, the little electronic beaver
toddler.
His pixel smile blinked happily as his grid-tail
tapped a rhythm.

The Tech Report

Glitchub tapped the river with his flat tail.
His screen eyes showed a spinning wheel.
“The river wants to download the sky,” Glitchub
beeped. “But the trees are blocking the signal!”

A Simple Experiment

Bunubu opened his knapsack and took out a smooth pebble.

“What if we make our own signal?” Bunubu suggested.

He dropped the pebble into the perfectly quiet water. *Plop!*

The First Ripple

The pebble made a beautiful round ripple.
The ripple touched a leaf. The leaf touched a
sleepy minnow.
Glitchub's eyes blinked with bright green pixels.
“Look! A connection!”

Splashing is Sharing

Glitchub jumped into the water with a giant

SPLAT!

He began to splash his tail, sending little drops flying like sparkles.

“Bubbling is just sending messages to the frogs!”

Glitchub cheered.

The River Wakes Up

The river began to tickle. It began to giggle.
It realized it didn't need a router to talk to the
world.
Moving and flowing was the best connection of all!

The Floating Souvenir

The rushing current carried a small treasure right to Bunubu's paws.
It was a perfectly round, glowing water-pebble.
Bunubu tucked it safely inside his leather knapsack.

About the Author

Vijay Kukreja

Vijay is a creative writer, technologist, and storyteller who enjoys turning simple ideas into imaginative stories for young readers. His stories are shaped by his own experiences, observations, family life, and curiosity about how technology can support human creativity.

With the help of AI tools, Vijay explores characters, scenes, visuals, and story worlds in new ways. He uses these tools not as a replacement for imagination, but as a creative partner to help bring playful ideas to life.

His goal is to create fun, warm, and engaging stories that children can enjoy, parents can share, and families can read together.

The End
